-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 25 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to more than one species and to more than one subspecies of the generic invention. These species and subspecies are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 shown in Figures 2 and 4

Species 2 shown in Figure 6

Species 3 shown in Figure 7

Species 4 shown in Figure 8

The subspecies are as follows:

Subspecies A shown in Figure 1

Subspecies B shown in Figures 3 and 5

Applicant is required, in reply to this action, to elect a single species and a single subspecies to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species and subspecies, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: 4, 5, 10

Species 2: 4, 5, 14-21

Species 3: 4, 5, 14, 22

Species 4: 24, 25

Subspecies A: 11

Subspecies B: 12, 13, 23

The following claim(s) are generic: 1-3, 6-9, 26, 27.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Species 1 relates to the special technical feature of the side surfaces of the grooves of the journal running in the radial direction being sloped relative to a plane at the wedge angle of the wedge shaped outer contour of the counter element. Species 2 relates to the special technical feature of the balance element being located on the journal next to the counter element and including a wedge-shaped outer contour. Species 3 relates to the special technical feature of the balance elements customizing the clamping length that lies between the stops of the journal to different dimensions.

Species 4 relates to the special technical feature of the journal including two joint areas separated from one another. Subspecies A relates to the special technical feature of the recess of the counter element being formed through a wedge-shaped notch.

Subspecies B relates to the special technical feature of the recess of the counter element being formed by a wedge-shaped tapered through hole in the counter element.

Species 1, 2, 3 and 4 and Subspecies A and B lack the same special technical features and thus do not relate to a single general inventive concept.

4. A telephone call was made to G. Gregory Schivley on February 5, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL P. FERGUSON whose telephone number is (571)272-7081. The examiner can normally be reached on M-F (6:30am-3:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571)272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
